

Insert a link without link text

The screenshot shows a dialog box titled "Insert link" with a close button (X) in the top right corner. It has two tabs: "To a wiki page" and "To an external web page", with the latter being the active tab. Below the tabs, there are two input fields: "Page title:" containing the text "Daisy Lowe" and a small icon to its right, and "Link text:" which is currently empty. At the bottom right of the dialog, there are two buttons: "Cancel" and "Insert link".

Highlight the link and click on link again

This screenshot shows the same "Insert link" dialog box as above, but it is overlaid on a text editor window. The text editor's toolbar includes options for "Heading", "List", "Size" (A+ A-), "Baseline" (A+ A-), and "Insert". In the text editor, the text "[[Daisy Lowe|]]" is highlighted in blue. The dialog box's "Page title" field contains "Daisy Lowe" and the "Link text" field also contains "Daisy Lowe". The "Cancel" and "Insert link" buttons are at the bottom right.

Expected outcome :

Always it should be the original which user entered. If the user not entered the link text, on a return it should display the same
