Hello,

Unfortunately, I didn't find a way to file a defect or contact you via github repo, so hopefully can get in touch via this email. I wanted to clarify, whether you are still actively maintaining pywikibot. If so, I have faced the following defect:

This code:

```
import pywikibot
site = pywikibot.Site()
page = pywikibot.Page(site, "Mary_Shelley")
list(page.imagelinks())
```

Produces the following exception:

```
-----
AttributeError                                Traceback (most recent call last)
<ipython-input-6-4ed5f522d407> in <module>()
      3 site = pywikibot.Site()
      4 page = pywikibot.Page(site, "Mary_Shelley")
----> 5 list(page.imagelinks())

~\Anaconda3\lib\site-packages\pywikibot\data\api.py in __iter__(self)
    2821         self.normalized = {}
    2822         try:
-> 2823             for result in self._extract_results(resultdata):
    2824                 yield result
    2825         except RuntimeError:

~\Anaconda3\lib\site-packages\pywikibot\data\api.py in _extract_results(self, resultdata)
    2770         """Extract results from resultdata."""
    2771         for item in resultdata:
-> 2772             result = self.result(item)
    2773             if self._namespaces:
    2774                 if not self._check_result_namespace(result):

~\Anaconda3\lib\site-packages\pywikibot\data\api.py in result(self, pagedata)
    2922         elif ns == 14:
    2923             p = pywikibot.Category(p)
-> 2924             update_page(p, pagedata, self.props)
    2925             return p
    2926

~\Anaconda3\lib\site-packages\pywikibot\data\api.py in update_page(page, pagedict, props)
    3325         if 'imageinfo' in pagedict:
    3326             assert(isinstance(page, pywikibot.FilePage))
-> 3327             page._load_file_revisions(pagedict['imageinfo'])
    3328
    3329         if 'categoryinfo' in pagedict:

~\Anaconda3\lib\site-packages\pywikibot\page.py in _load_file_revisions(self, imageinfo)
```

```
2456     def _load_file_revisions(self, imageinfo):
2457         for file_rev in imageinfo:
-> 2458             file_revision = FileInfo(file_rev)
2459             self._file_revisions[file_revision.timestamp] = file_revision
2460

~\Anaconda3\lib\site-packages\pywikibot\page.py in __init__(self, file_revision)
5496     """Initiate the class using the dict from L{APISite.loadimageinfo}."""
5497     self.__dict__.update(file_revision)
-> 5498     self.timestamp = pywikibot.Timestamp.fromISOformat(self.timestamp)
5499
5500     def __eq__(self, other):
```

**AttributeError:** 'FileInfo' object has no attribute 'timestamp'

It is like that with a few pages that have some (corrupted?) images.

Thanks,  
Oleh
